Ideation Phase
Define the Problem Statements

Date	31 January 2026
Team ID	Individual
Project Name	EV Market Performance & Sustainability Analytics
Maximum Marks	2 Marks

Customer Problem Statement Template:

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love.

A well-articulated customer problem statement allows you and your team to find the ideal solution for the challenges your customers face. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

I am	Describe customer with 3-4 key characteristics - *who are they?*	Describe the customer and their attributes here
I'm trying to	*List their outcome or "job" the care about - what are they trying to achieve?*	List the thing they are trying to achieve here
but	Describe what problems or barriers stand in the way – *what bothers them most?*	Describe the problems or barriers that get in the way here
because	Enter the "root cause" of why the problem or barrier exists – *what needs to be solved?*	Describe the reason the problems or barriers exist
which makes me feel	Describe the emotions from the customer's point of view – *how does it impact them emotionally?*	Describe the emotions the result from experiencing the problems or barriers

Example:

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel

PS-1	An EV market strategy director	identify leading vehicle categories, sales trends, and battery technologies	market information is spread across many fields and is difficult to compare quickly	there is no single interactive view of sales, category, and battery performance	uncertain about which segments and technologies should receive strategic focus
PS-2	An automotive business intelligence manager	compare manufacturers, manufacturing countries, driving range, and sustainability indicators	manual analysis of large datasets is time-consuming and makes patterns harder to spot	the data contains many records and multiple performance measures	less confident when preparing timely, evidence-based recommendations for clients
